Summary

I am a skilled Frontend Developer with **3.5 years of experience** in crafting responsive and interactive user interfaces using React and Angular. Proficient in **JavaScript, TypeScript, ES6+ features, HTML5, CSS3**, and state management with **Redux**, delivering seamless integration with **RESTful APIs**. Developing reusable components, optimising application performance, and utilising modern UI libraries to enhance user engagement. Demonstrates strong collaboration and problem-solving skills, delivering innovative solutions aligned with business goals.

Technical Skills

- React JS, Redux, Angular, JavaScript, TypeScript, NodeJS, MongoDB, HTML5, CSS3, GIT, Docker, Agile Methodology,

Project Experience

Frontend Engineer: AVA+ Michelangelo (Artificial Intelligent Web Tool)

Product: Ascendion Technologies Pvt Ltd | Consulting Firm: Ascendion Technologies • Hyderabad

Duration: 01/2024 - Present

- Designed and developed a responsive UI using React, focusing on user-friendliness and alignment with client specifications.
- Built reusable and modular UI components using libraries like Re act-Strap, enabling efficient routing and MSAL-based authentication.
- Integrated a real-time canvas editor, allowing users to create wireframes seamlessly converted to code by AI.
- Ensured robust API integration with back-end systems to enable real-time data generation from AI LLM modules.

Frontend Engineer: Huron Research Suite (HRS V12)

Client: HURON | Consulting Firm: Ascendion Technologies • Remote

Duration: 11/2022 - 01/2024

- Ensured Developed features in the Conflict of Interest (COI) module to streamline compliance and user workflows.
- Enhanced dashboard usability with hyperlink IDs for seamless navigation to detailed information.
- Reduced critical bugs by 30% through timely debugging and collaboration with QA teams.
- Delivered agile solutions, adhering to sprint timelines and improving team velocity.

Integrated Banking Solution (IBS) Modernization

Client: FIS Global Consulting Firm: Ascendion Technologies • Remote

Duration:02/2022 to 09/2022

Banking Domain project Involved in development of UI Layer & transformation of an application from Internet Explorer (IE) compatibility to support modern browsers (Chrome, Firefox, Edge) using Angular 12.

- Modernised the UI layer by transitioning from IE compatibility to support modern browsers using Angular 12.
- Enhanced user interactions with AJAX calls and callback functions, ensuring responsiveness.
- Constructed modular form components with Angular Formly that improved code maintainability while facilitating rapid iteration.
- Transformed the user experience by minimising load times from 5 seconds down to under 2 seconds.
- Implemented data validation logic and custom mappings, ensuring a 95% reduction in manual intervention.

Key Achievements and Contributions

- Delivered high-performance, scalable UI solutions contributing to the digital transformation journey of clients.
- Designed applications with adherence to quality processes and estimation techniques, ensuring project success.
- Continuously improved application accessibility and performance, aligning with best practices in design and development.

Soft Skills

- Effective Communication.
- Presentation
- Collaboration & Team Leadership
- Strategic Task Planning and Prioritization
- Analytical Thinking and Problem Solving

Education

Bachelor Of Engineering

Datta Meghe Institute of Engineering Technology and Research.

R.T.M Nagpur University.

NOV 2020.
